SAP Plant Maintenance Console Installation
2.1.1 PM Console System Requirements

The system requirements and other components required to run PSC.

Prerequisites

You must have the following components in order to use PSC.

SAP GUI

You must have a valid installation of SAP GUI in order to use the PSC. The following versions of SAP GUI are supported:

- SAP GUI 7.10 or later

WS engine

PSC is built on Synactive's GuiXT WS technology and requires the WS engine. The engine is available as a part of the Desktop or Server solutions. We will not cover the WS engine in this document. Please consult the WS Reference Library for more information on WS.

Supported Operating Systems

The following operating systems are supported.

Note: The name of each OS links to that operating system's system requirements page.

- Windows XP
- Windows Vista
- Windows 7
- Windows Server 2003 (Enterprise Edition)
- Windows Server 2008

Note: PSC does not require any extra system capacity above and beyond Microsoft's operating system requirements.

Training

The PSC is designed to be a completely self-contained solution - no training should

(c) 2026 Liquid UI | Synactive | GuiXT <dev@guixt.com> | 2026-10-09 15:18

be necessary for your users. However, Synactive does offer several training packages for devlopers and others who may wish to customize other GuiXT solutions. The available packages are as follows:

- **Development Training:** A Synactive corporate trainer will thoroughly teach your team how to implement and use GuiXT.
- **Professional Services:** One or more Synactive consultants will come to your site and implement GuiXT for a complete, turnkey solution.

Please contact Synactive Sales for additional information on the Development Training and Professional Services options.
