SDK - Rapid Apps

6.1 Introduction to Rapid Apps

Liquid UI SDK is bundled with three Rapid Apps, namely Asset Lookup, Stock Overview, and SAP Basis. You will find a complete set of files required to render the Apps on mobile devices.

Prerequisites

- Configure Liquid UI Server of Liquid UI SDK
- Install Liquid UI for Android/Liquid UI for iOS App
- Liquid UI for Android/Liquid UI for iOS must be in the same network as the Liquid UI Server via Wi-Fi or VPN.

The Liquid UI Rapid Apps are highly customized prebuilt applications that are easy to deploy in most cases within three days. These Apps gives users a consolidated approach and data insights in real-time to drive business. All the development logics are predefined and prebuild to the restricted requirements of specific jobs while leaving essential SAP coding untouched. Rapid Apps are designed to accelerate the simplification and usability of SAP transactions.

Liquid UI Rapid App's purpose is to deploy the applications rapidly. This app makes SAP ERP applications easier to visualize for anyone through a consolidated approach. It is an extremely customized prebuilt app and can deploy effortlessly on multiple touchpoints – iPad, iPhone, Android, Desktop, Web. With Liquid UI Rapid App mobile application for iPhone/iPad, SAP empowers you by providing immediate access to the most relevant information to enable you to run your business from any location, at any time. You can manage customer and partner data, process pending approval requests, view reports, and much more.
