Edit Features

5.01 Liquid UI Inplace Edit

Liquid UI Inplace Edit is used to customize the SAP screens easily without the need of low-level programming languages like ABAP and Java. This tool generates WS scripts automatically when you add elements on the SAP screen.

After Installation of Liquid UI Inplace Edit, you can view Liquid UI button on the toolbar at the top right of the SAP screen. Click on the Liquid UI button, this enables the user to view WYSIWYG editor and Script editor on the SAP screen. These are as follows:

Graphical (WYSIWYG) Editor

The graphical WYSIWYG (What You See Is What You Get) editor enables you to customize SAP screens and the appropriate script will be generated automatically. To know more about WYSIWYG editor, click here.

Script Editor

The script editor enables you to edit your script at the code level. You can input your script directly to make any necessary modifications. To know more about Script editor, click here.
