Server Deployment
3.2 Server Sizing Requirements

Liquid UI Server sizing requirements.

The sizing requirements for the various deployment scenarios are as follows:

Number of Users	OS	CPU	RAM	HD Free Space
100	64-bit Windows 2003 Server 64-bit Windows 2008 Server 64-bit Windows 2012 Server 64-bit Windows 2016 Server 64-bit Windows 2019 Server 64-bit Windows 2022 Server	8 CPU or equivalent	8 gigabytes	40 gigabytes
200	64-bit Windows 2003 Server 64-bit Windows 2008 Server 64-bit Windows 2012 Server 64-bit Windows 2016 Server 64-bit Windows 2019 Server 64-bit Windows 2022 Server	16 CPU or equivalent	16 gigabytes	40 gigabytes

Calculating Memory

Server Deployment

Liquid UI Server typically requires approximately 18 MB per logged-on session or connection. This can be used to calculate memory requirements for additional users. For installations where there are more than 200 users, we recommend implementing a load-balancing solution. Please see the Load Balancing section for more information on implementing load-balancing with Liquid UI Server.
