Web Server Appendices

6.3 Using Web Server with SAP Portals

A portal is a website that functions as a suite of commonly used services. It also serves as an entry point or gateway to the Web. You can configure SAP NetWeaver to serve as such a portal for integration with the Web Server. This section will explain how to configure SAP NetWeaver as a portal for Web Server. The following topics will be covered.

- Creating Folders
- Creating Roles
- Creating iViews
- Creating Pages
- Creating Worksets
- Adding iViews to Pages
- Creating Users
- Adding Roles to Users
- Creating Groups and Assigning Roles
- Adding Users to Groups
- Configuring Single Sign-On
