Android Introduction

2.3.19 Performance Assistant (F1 Help) on Input fields

Liquid UI for Android offers **Performance Assistant (F1 Help)** screens, mirroring the functionality of SAP GUI help windows. This feature delivers contextual information on screen elements like labels and input fields, aiding users in comprehending SAP fields directly within the mobile interface.

By providing dynamic help options based on the chosen label or input field, Liquid UI for Android significantly improves user interaction through a streamlined interface. These include:

1. F1 help
2. Application help
3. F4 help

This article demonstrates activating and using the **Performance Assistant screen** (**F1 Help**) in Liquid UI for Android, using **VA02** as an example.

Enable F1 Support

1. Login to SAP and navigate to the **VA02** transaction. Go to **System Menu → Help → Settings**.

2. In **Personal Settings for User**, select **Performance Assistant** and click **Proceed** to apply the setting.

You have now successfully enabled F1 Help support.

Accessing F1 Help in Liquid UI for Android:

1. Long-pressing **Order** label shows a pop-up with **Select**, **Help**, and **Copy** options.
