Android Introduction

2.3.04 Profile Management with LAMP

Liquid UI Access Management Portal (LAMP) is a self-service web portal where you can manage user profiles by adding or removing their licenses and SAP connections. Also, you can grant user-level permissions to access only the required settings in the Liquid UI for Android apps. Furthermore, you will be able to view the purchased license details and their validity.

LAMP lets you use Liquid UI for SAP apps on a monthly/yearly basis. It offers enterprise licenses for Android and iOS products. The enterprise edition offers users additional features.

Learn more about the pricing model for Android and iOS

Liquid UI Access Management Portal is designed to meet the following objectives:

- Helps to meet your dynamic license requirements
- Allows organizations to deploy product licenses
- Sets SAP connections over-the-air
- Manage bulk licenses and track license usage

The Liquid UI licensing delivers visibility into your license ownership and consumption of licenses. Providing licenses to your employees and managing their activities was not easy before. Now, LAMP eases the process of generating and sharing licenses among multiple instances as required for different situations, such as departments, teams, company users, and more. This adds a measurable benefit to the organization.
