Scanguns Introduction

1.1 Scanguns Overview

The Liquid UI for Handheld Scanguns solution enables you to access SAP systems from any Windows CE or Pocket PC based device. Using Liquid UI technology (delivered via Liquid UI Server), you can simplify and customize SAP transactions so that they can be viewed via small handheld devices. Liquid UI for Handheld Scanguns is a natively built application and so does not require any dependence on a web browser or any third party middleware. Furthermore, screen customizations are achieved by using the proven Liquid UI platform without changing any business logic or writing any ABAP code.

In this document, we will cover the installation, configuration, features, and utilization of WS Mobile.
