Designer Introduction
Revision History

This section of the document contains the changes made to this document since the baseline 2.11.205.0 release. Please note that not all changes will be noted. Synactive uses the following methodology to track document revisions.

New Features

Any new features added to the WS engine will be noted and the release version in which they first appear will be included. You can also check feature additions in the version history matrix in the Appendices.

Content Corrections

Any content that is subsequently found to be inaccurate will be corrected and the correction will be noted here, together with the relerase version in which the correction was made.

Content Additions

Any content that is added to a particular section of the document will be noted in this section, together witb the version in which the addition was made.

Content Deletions

Content is never deleted. It may be corrected or additions may be made, but we do not delete content.

Typographical and Grammatical Corrections

Typographical errors and grammatical errors will be corrected silently and will not be documented. These types of errors will only be noted if the correction changes the actual meaning of the content. Screencaps that are mis-sized will also not be noted when they are corrected.

Screen captures

Screen capture updates will not be noted unless the change affects the actual
