SAP Materials Management Console Introduction

1.1 SAP MM Console Overview

Overview of the Material Management console application.

The Materials Management Decision Making Console (DMC) is a new application from Synactive. This is built on Synactive's GuiXT WS platform technology and enables you to centrally manage materials in SAP. MMC is designed to enable employees to view, interpret and analyze large amounts of work order data on a single screen. This has the benefit of streamlining maintenance and reducing the amount of preparatory work necessary.

Some of the benefits that are available with DMC are as follows:

- Viewing details of selected materials.
- Customizing which details of a material to view.
- Viewing historical data associated with a material.
- Full integration with SAP ERP.
