3.2 Add SAP Search Help

Steps to add SAP search help:

Note: You must have GuiXT's search help ABAP program installed in SAP in order to utilize search help options on GuiXT fields.

Scenario 1

- Modify the screen you want the user to see. Remove unnecessary fields/tabs and add custom fields.
- Disable GuiXT.
    - You may temporarily disable GuiXT by typing in the transaction bar: /ws_WS=0
- Navigate to the default SAP field with the search help you want to copy.
- Select the field by clicking on it, then press F1 to bring up the field help.
- Click on "Technical Information"
- If you see the search help displayed, copy it.
    - If you are unable to see the search help displayed, go to Scenario 2.
- Re-enable GuiXT.
    - If you used the command above, you may re-enable by using **/ws_WS=1**
    - You may need to refresh the screen by typing in the transaction bar:?
- In Designer right-click -> Properties on the field you want to add the help to.
- Click on the "Search Help" tab, click the radio button for SearchHelp, and then place the search help you found here.
- Save in Designer and all the changes will appear in SAP.

Scenario 2

- Repeat scenario 1 until step 5.
- Double-click on "Field Name". (You will need access to SE11)
- Double-click on the Field.
- Copy the Search help name.
- If you see the search help displayed, copy it.
    - If you used the command above, you may re-enable by using **/ws_WS=1**
    - You may need to refresh the screen by typing in the transaction bar: **?**
- In Designer right-click -> Properties on the field you want to add the help to.
- Click on the "Search Help" tab, click the radio button for SearchHelp, and then place the search help you found here.
- Save in Designer and all the changes will appear in SAP.
