WS Introduction

1.4 WS System Requirements

This section will cover the following topics:

- System Requirement
- Required Files

The system requirements for WS are as follows:

- **RAM:** 1GB.
- **HDD:** 20MB and above.
- **SAP:** All versions of SAP GUI from 6.0 are supported, but we recommend SAP GUI 7.20 or above for the best results.

Supported Operating Systems

The supported operating systems for WS are:

Note: The links navigate to the individual operating system requirements pages on Microsoft's web site.

- Windows 10
- Windows 8
- Windows 7
- Windows Vista
- Windows XP
- Windows Server 2012
- Windows Server 2008
- Windows 2003 Server (Standard Edition)
- Windows 2003 Server (Enterprise Edition)

Required Files:

The following files are required for WS to function correctly. These files will be installed by the Install Wizard.

guixt.dll: Contains the functions and libraries called by the GuiXT executable. You must have the correct DLL in order to use WS/64.

guixt.sjs: Configuration file where you can specify the location of the script folders and change WS parameters.

webscript.dll: Contains the JavaScript parser, allowing the client-side JavaScript to communicate with the server-side C++ code.

Unique solution ID: #1788
